

BACK TO SCHOOL, BACK TO HEAD LICE?

Consider Resultz[®] for the treatment of head lice in adults and children 2 years of age and older¹

- Works in just 10 minutes¹
- Dissolves the waxy shell of the lice, causing water loss from their body; once they lose the protective layer the lice dehydrate, become immobile, and die^{1*}
- Because Resultz[®] works differently from other commonly used head lice treatments, it may also be an effective treatment in those cases where others have failed¹⁺
- Resultz[®] does not contain commonly used pesticides and is colourless, odorless and leaves no chemical residue^{1*}
- Resultz[®] contains 50% isopropyl myristate. After the first treatment on day 1, a second treatment must be applied 7 to 10 days later to kill any lice newly hatched from eggs.¹

Warnings: For external use only. Tell patients not to use near the eyes; if product gets into eyes, instruct them to immediately flush with water. Keep out of reach of children. If swallowed, instruct patients to get medical help or contact a Poison Control Centre.

If the infestation recurs or persists after the second application, patients should consult a doctor. Tell patients to stop use and consult a doctor if skin irritation or infection is present or develops, and if infestation of eyebrows or eyelashes occurs.

Instruct patients to consult the package insert for complete information on dosage and application.

See Warnings, Cautions, and Directions of Use at <http://aralez.com/wp-content/uploads/2016/03/Resultz-Consumer-Information-ENGLISH.pdf> for information to assist in benefit-risk assessment. Always direct the patient to read the label. If you have any questions or require the Terms of Marketing Authorization or any additional information concerning Resultz[®], please do not hesitate to contact Aralez Pharmaceuticals Inc. at 1-866-391-4503.
